The mystery of galaxy formation

By Daniel Thomas

Galaxies are islands in a universe filled with invisible dark matter. They are the sites where stars and planets form, live and evolve. We will discuss the very beginning of time when the first stars have formed moving on to eras of vivid galaxy formation many billion years ago and to the beauty of today's universe filled with a zoo of galaxies of different types, sizes, shapes, and colours.

When: 7 for 7:30 pm Where: Bridge Pâtisserie 20 Bridge st
Winchester SO23 9BH Contact: Moira at The Pâtisserie on 10962
