Science Ka Adda

Are you curious about the human genome project, but intimidated by ivory-tower scientists? Do you wonder whether the Big Bang actually happened? Is there life beyond earth? What happens when stars collide? What are the social implications of nanotechnology?

T2F's Science Ka Adda, hosted by Zakir Thaver, is a platform for debate and discussion about science and how it impacts our lives. Join us, in an informal café setting, to discover new ideas in science and technology, interact with scientists, and satiate your curiosity.

We are delighted to announce that Dr. Pervez Hoodbhoy, one of Pakistan's most eminent scientists, has agreed to come on board as the Chairperson of T2F's Science Ka Adda.

T2F Presents Dr. Pervez Hoodbhoy on Thursday 21st June 2007

From Quarks to Humans

Take a journey through 13 billion years, from the big bang to the early universe, to stellar formation, to the creation of the earth and life — and beyond. Find out what matter is, how simple non-living atoms on primitive Earth combined to make the molecules needed for life and what life's future is on Earth. How do we know what we know? What sort of evidence do we have to back our claims? What questions remain unanswered? Are we alone?

Date: Thursday, 21st June, 2007

Time: 6:00 pm - 7:00 pm (There will be no café service *during* the talk)

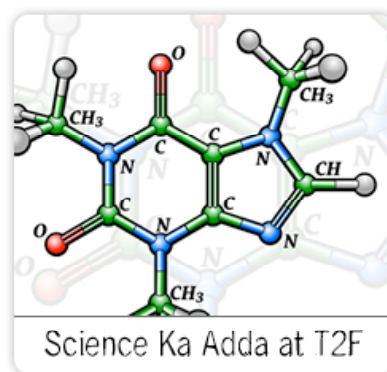

Entry Fee: Rs. 100

Venue: The Second Floor

6-C, Prime Point Building, Phase 7, Khayaban-e-Ittehad, DHA, Karachi

Phone: 538-9273 | 0300-823-0276 | info@t2f.biz

Seats are limited and will be available on a 'first come, first served' basis.
